

KEYSTONE

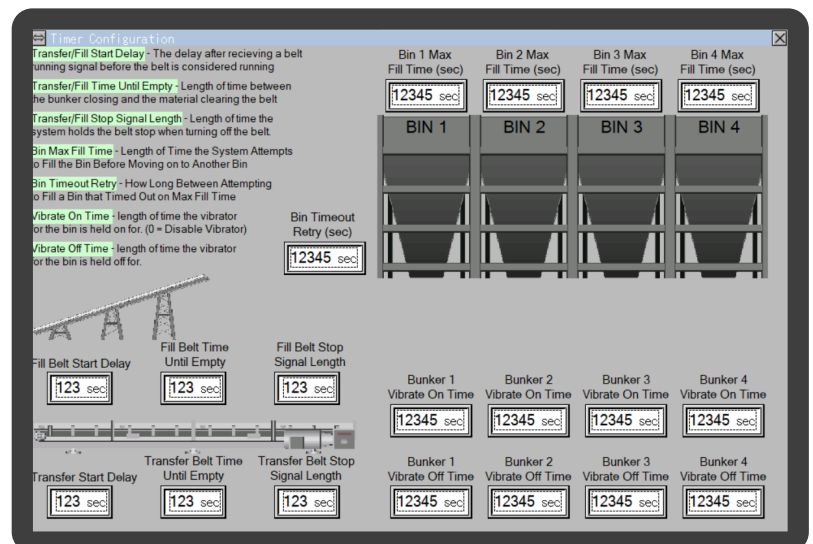

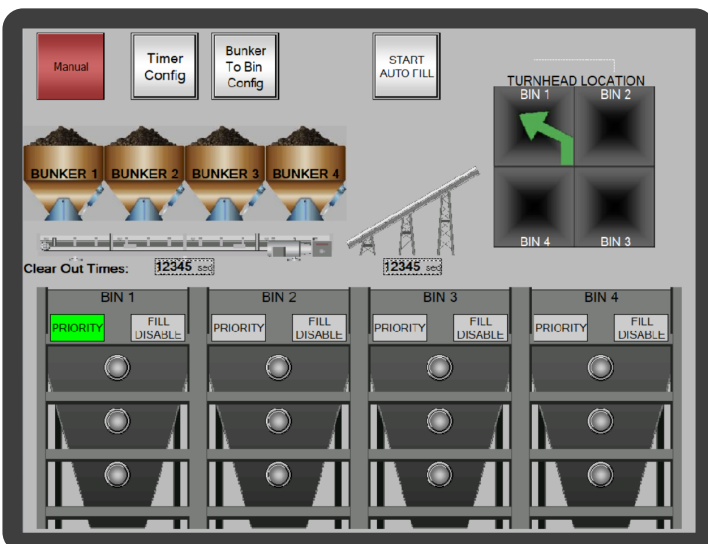

MATERIAL HANDLING

CUSTOM CONFIGURATION FOR YOUR PLANT

Transform your material handling process with a PLC-driven, fully automated filling solution that keeps your plant ahead of the curve. Say goodbye to manual inefficiencies and hello to speed, precision, and productivity. Our intuitive control panel with an integrated HMI touchscreen gives you complete visibility and effortless configuration changes—so you're always ready for the next order.

OUR SYSTEM OFFERS:

- Supports Aggregate Bin to Aggregate Bunker Hopper linking.
- Easy to reassign which ground hopper supplies material to each bin.
- All time settings are detailed and customizable by the customer from the integrated HMI.
- Can manually disable any number of bins from the automated filling via singular button.
- Supports high priority main bin system.
- Full manual control as well as automated loading.
- Not just for Keystone Batch, Material Handling can be installed as a stand-alone product on any concrete plant.
