

KEYSTONE DISPATCH

Keystone Dispatch is flexible enough to work as a stand-alone module or as part of the Keystone Integrated Suite. That means you can get the most out of Dispatch by adding Keystone GPS, Accounting, and Batch for the ultimate combination in accuracy, productivity, and efficiency. Comprehensive features and an easy to use interface makes Keystone Dispatch a growing choice among producers and a reliable partner in the dispatch office. This is because Dispatch provides everything you need to schedule and track your trucks on one screen, including continuous order and status updates throughout the delivery process.

With more than 40 years of experience in the ready-mix concrete and aggregate production industry, GivenHansco has a deep understanding of the need for an all-in-one accounting system for the construction materials industry. This is why we designed Keystone Dispatch from the ground up to provide your business with a single solution that runs from field operations to billing and all the way to your financial statement. This seamless integration reduces redundant data entry, eliminates costly interfaces, and gives you advanced business analysis and reporting at the touch of a button.

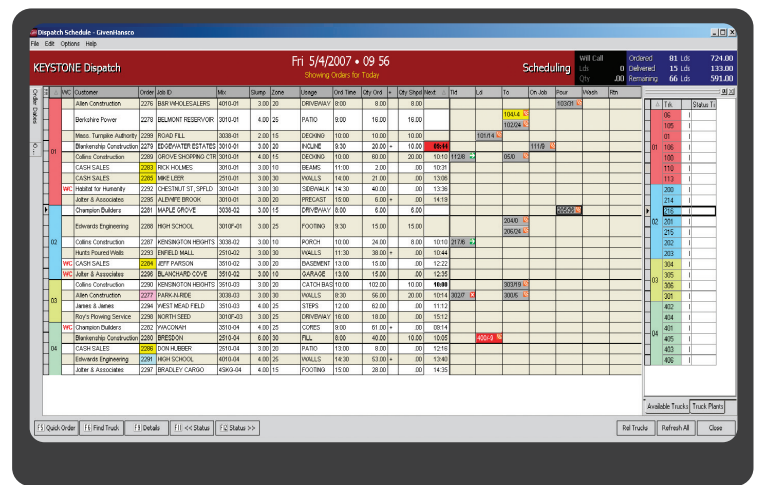

Contact GivenHansco for a demonstration of how Keystone Dispatch and the Keystone Integrated Suite can improve your business.
