

KEYSTONE GPS

Designed by GivenHansco from the ground up, Keystone GPS is a comprehensive, truck-focused, tablet based GPS suite that offers a realm of streamlined customer service control and logistics management possibilities for today's concrete industry. GPS offers a multitude of á la carte add-on functions to provide an immediate overview of focused information that can be leveraged from virtually anywhere.

On-Delivery features an online dispatch dashboard that allows users to view real-time current day orders and detail including plant(s) ordered and delivered amounts. The GPS truck tracking with statusing and text messaging provides vital instant/constant communication between driver and dispatch. It also allows drivers to view ticket information, with key information such as products and any extra products-all before the truck is loaded. Compatible with most Android devices.

Keystone On-Delivery is a competitively priced addition to GivenHansco's Keystone integrated Online product family and is comprehensively backed by a customer service support system that is unparalleled in the industry.

OPTIONAL ADD ON'S INCLUDE:

Guided Navigation

Provides live truck route friendly turn-by-turn directions to and from the job site, preventing drivers from getting lost. The detailed truck route shows bridges, weight limits, and re-routes automatically if necessary, saving time and money and increasing safety.

Push-To-Talk Radio Replacement

Provides a button on the driver's tablet that enables radio-like communication with dispatch, other drivers, and customized groups. Drivers can also mute channels not needed for the day.

E-Ticketing

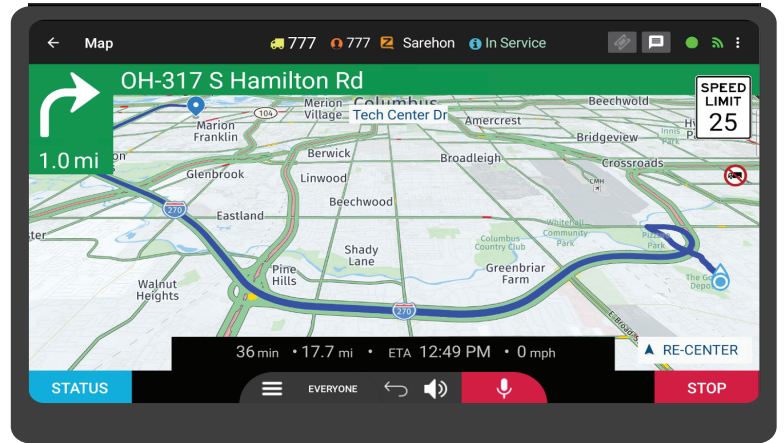

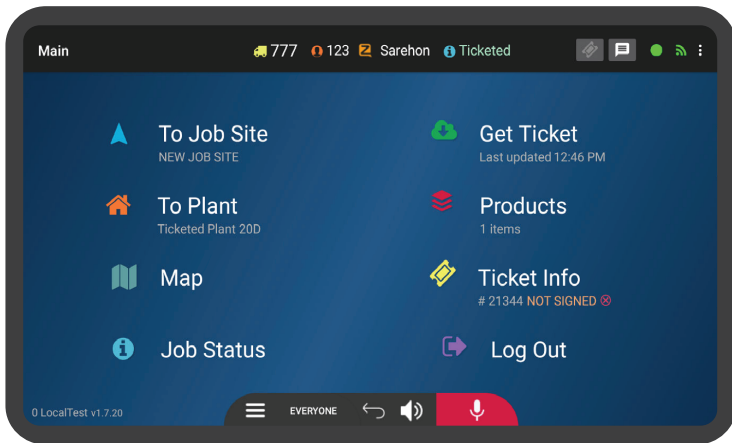

An electronic ticket that can be signed on-site and emailed to customers and inspectors immediately. The E-Ticket shows the exact latitude and longitude of the job site for accuracy.

E-Logging

Records driver hours for DOT compliance.

State Mileage Reporting

Records miles being driven between different states
